

Passive Fire Protection

The importance of passive 'built-in' fire protection cannot be emphasised enough. Passive fire protection is a vital component of any fire safety strategy. It is built into the structure of a building to safeguard people's lives and limit the financial impact of damage to buildings and their contents.

Did you know?

- Every year there are more than 100,000 fires in buildings in the UK*

How can we help?

At Aviva, we can provide a range of passive fire protection products and services through our Specialist Partner, Checkmate Fire.

Services range from surveys and inspections to installation, maintenance and compliance.

They operate two divisions:

- Compliance providing inspection, training and consultancy services
- Solutions – for third party accredited installation of fire stopping

What are the benefits?

- Supports compliance and your regulatory responsibilities
- Reduces the impact of major losses
- Supports business resilience to keep your business trading
- Enhances life safety measures
